The drawings were received on 17 June 2005. These drawings are accepted.

Allowable Subject Matter

Claims 34-66 are allowed.

The following is an examiner's statement of reasons for allowance:

Claim 34 is allowable for at least the reason, "wherein the first layer and second layers are each formed from an inhomogeneous mixture of said first material and said second material, wherein the optical thickness of said first layer and of said second layer each differ in magnitude from the value $2Q$ by less than $Q/2$, and the optical thickness of said third layer differs in magnitude from the value Q by less than $Q/2$, where Q is the thickness of a given said layer traversed by substantially one quarter of a wavelength of optical radiation of a common reference wavelength at which said optical thicknesses are determined, and wherein all variations in the index of refraction of the first and second layer increase that index of refraction as the depth of the respective layer increases from regions thereof remote from said third layer to regions thereof proximate the third layer" as set forth in the claimed combination. Claims 35-50 are allowable due to their dependence on claim 34.

Claim 51 is allowable for at least the reason, "forming the first layer and second layer from an inhomogeneous mixture of the first material and the second material, and

wherein said first layer and said second layer are each formed with an optical thickness which differs in magnitude from the value $2Q$ by less than $Q/2$, and said third layer is formed with an optical thickness which differs in magnitude from the value Q by less than $Q/2$, where Q is the thickness of a given said layer traversed by substantially one quarter of a wavelength of optical radiation of a common reference wavelength at which said optical thicknesses are determined, and wherein the first and/or second layer is formed such that all variations in the index of refraction of the first and/or second layer increase that index of refraction as the depth of the respective layer increases from regions thereof remote from said third layer to regions thereof proximate the third layer” as set forth in the claimed combination. Claims 52-66 are allowable due to their dependence on claim 51.

The prior art of record, US2006/0262389 Zaczek, US2005/0141093 Weber and US 6049419 Wheatley et al are considered relevant.
